## Product Weight Change 13mm GIB Fyreline® and 13mm GIB Aqualine®

As you may be aware we are now despatching Tauranga manufactured plasterboard throughout the North Island.

With this there is a subtle change to the weight of Tauranga manufactured 13mm GIB Fyreline® and 13mm GIB Aqualine® with the target weight increasing from 10.5kg/m<sup>2</sup> to 11.0kg/m<sup>2</sup>.

From mid September 13mm GIB Fyreline® and 13mm GIB Aqualine® despatched in the North Island will start transitioning to the 11.0kg/m<sup>2</sup> weight. Product despatched in the South Island will remain at the 10.5kg/m<sup>2</sup> weight.

Our system weights have been updated to reflect this to ensure the appropriate weights are used to calculate the weights that appear on your Winstone Wallboards order documentation.

See table below for new North Island weights by SKU.

We have also updated on our website the published maximum weights of these products from 11.0kg/m<sup>2</sup> to 11.5kg/m<sup>2</sup>, noting that all published maximum weights include a conservative additional buffer.

Please update your records as appropriate to reflect these changes.

It is important to know that our robust qualification and ongoing quality control processes ensures that all GIB® plasterboard distributed in the market is fit for purpose, meets all performance requirements and has the normal product warranties and technical back up.

If you have any queries please call the GIB® Helpline on **0800 100 442**.
