

You know the convenience of using GIB® Services. But do you know how much value these services add to your bottom line?

GIB® Services help improve your on-site productivity and can reduce your costs though efficiencies, less waste and damaged board and fewer injuries. Our technical support can help to find the most efficient and cost effective system for your needs and if questions arise in design or on-site, we get you answers you can trust, quickly, to help keep your project on track.

When comparing costs, factor in the benefits and added value from technical support to delivery services that save your project time and money.

Technical Support Services

With comprehensive technical information always at hand and a professional team of hugely experienced builders and building engineering experts available by phone, online or face-to-face, you'll always get the right information when you need it.

- Quick answers save you time. GIB® technical literature and manuals provide robust, accurate and logically organised information making it easy to find what you're looking for.
- We support your wider consultant team. Our GIB® Technical Support team will provide direct, specific and localised design advice.

- Save time using GIB® CAD and BIM details.
 For accurate, engineered solutions that avoid unnecessary risks in detailing from first principles.
- Reduce the risk of on-site problems. Rely on our GIB® Technical Support team to assess and make recommendations for the best solution regarding our system.
- Developed for New Zealand codes and conditions. Have peace of mind that you can trust the systems will perform as claimed and designed.

Customised Delivery Services

Commercial sites require a range of delivery solutions and our award winning team will find the most efficient delivery service for your project. Delivery can be coordinated with crane schedules on large sites and special packaging such as shrink wrapping and/or strapping can also be arranged.

DELIVERY NATIONWIDE

Freight-into-Store is where product is delivered to a customer merchant store.

DELIVERED TO SITE SERVICE

Delivered directly to a building site address (Auckland, Hamilton, Tauranga, Wellington, Christchurch only).

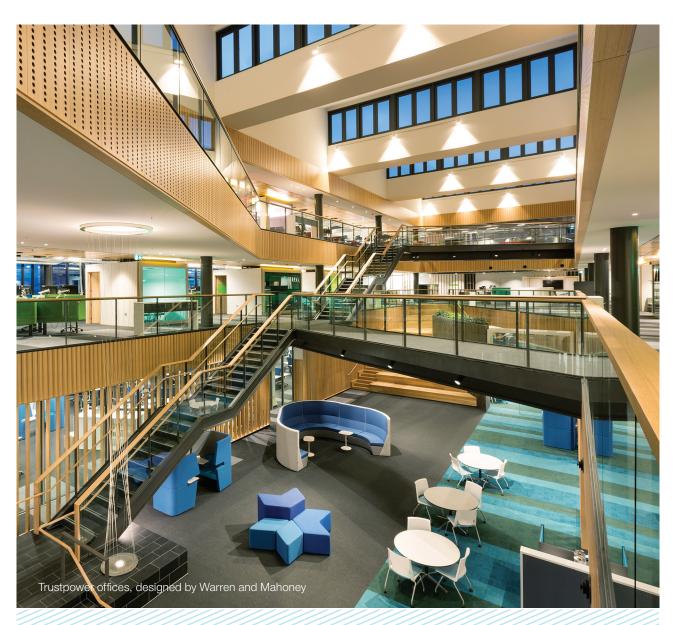

- Save time and money. Our experienced logistics mean we always have stock available, fewer delays and efficient programming of plasterboard deliveries.
- Minimise failed delivery costs. Free site inspections are available to ensure site is plasterboard-ready so you're not paying for additional or unnecessary services.
- Keep your builders building, not moving plasterboard. Our experienced delivery team will ensure that your GIB® plasterboard is unloaded, carried to the right floor and split into room lots as required**.
- We'll replace damaged board at our cost, if damaged during delivery. Using our delivery team takes the risk out of damaging the product when moving it around site.
- Less risk of expensive downtime. Use our experienced delivery team to carry plasterboard around the site allowing your team to stay safe and keep on task.
- *Subject to some order conditions.
- **Some conditions and additional charges may apply.

Case study: Delivered to Site Service

WAYNE STEVENS, OWNER, INTERIOR PLASTER SERVICES, CHRISTCHURCH

"DTS is much quicker for us and saves us money, definitely. We just have one guy to work with DTS, and our other guys carry on. If we've got to bring guys in ourselves to deal with moving the plasterboard, it adds a lot of complication and cost with having extra guys there. For our commercial jobs, the DTS guys turn up a couple days before for a site check, so they already know what they are in for. It just helps everything run more smoothly."

Case study: Technical support

BRYCE SCUDDER, ARCHITECTURAL TECHNICIAN, WARREN AND MAHONEY, QUEENSTOWN

Architects and designers need to have a broad knowledge of a wide range of technical issues within buildings; but we can't be experts on everything. When dealing with linings and wall systems, the knowledge of the GIB® team provides a level of expertise that allows us to detail and specify with confidence. Commercial projects always bring up a number of unique and often tricky situations, so when we are not sure about a specific detail, particularly something as important as a fire resistance system, it's great having that backstop of the GIB® team to check with.

I recently emailed the GIB® Helpline with a query about detailing a GIB® Fire System. We discussed similar details that they had previously advised on and they talked me through a few options of how best to amend this particular detail without being proscriptive. Having a few ways of getting to a solution as opposed to being constrained to a single fix is very helpful. There is a real sense of practicality in their advice; with the fire detail I was checking, they asked me if I had allowed for tolerance on site. Having that sense of buildability on site as opposed to what's drawn on a page proved invaluable.

Consistent product quality means efficiency in installation

Extensive internal quality control and leading edge technology ensures GIB® plasterboard and accessories offer proven reliability.

- Clean score and snap. Means cleaner cuts and better edges.
- Quicker installation. Easy screw bedding and excellent uniformity mean a consistent, quality finish and less need for rework or additional plastering.
- Efficiency in installation. Subbies are on site for less time, freeing up workspaces and saving you money in delays or damage.
- Less wastage. Low edge breakout and damage in GIB® plasterboard.
- Less risk of damage. Great flexibility means easy sheet manoeuvrability.
- Fewer callbacks. GIB® plasterboard is strong and rigid with low sag meaning easy sheet lifting and flat ceilings.

PLASTERBOARD MADE HERE

We supply merchants from our plasterboard manufacturing bases in Auckland, Christchurch and our warehouse in Wellington. We keep sufficient stock at all times to ensure we can meet demand.

- Fewer delays. Our wide range of stock lengths are available as and when needed.
- Nationwide delivery. Local plasterboard manufacturing and warehousing allows nationwide delivery for all GIB® products.
- Keeping jobs here. Supporting New Zealand businesses, jobs and local plasterboard manufacturing.

CUT TO LENGTH

Order your plasterboard to the specific length you need*. Customising board lengths to stud heights or wall lengths can result in significant labour savings through less cutting, stopping and waste.

- Faster installation. Less on-site handling, material savings and improved quality of finish due to fewer joins.
- Less waste. Save labour in disposal and cost in dumping, as well as being good for the environment.

^{*}Some conditions apply, including minimum order quantities and lead times.

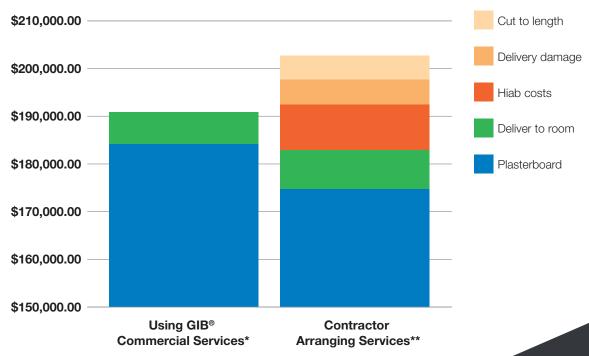

Demonstrated Value

The GIB® Commercial Services combined, provide significant savings in materials, time and hassle, reducing the risk of things going wrong on-site. By using the GIB® Commercial Services the obligation for delivery in-full, on-time and to your specifications becomes our worry, one that we take on daily and have worked hard to get right.

So next time you're planning to order GIB® plasterboard and accessories, why not let us take care of the hassle. Talk to your merchant when ordering, call your local GIB® Area Sales Manager or call the GIB® Technical Support team on 0800 100 442 for more information.

POTENTIAL VALUE THROUGH USE OF GIB® COMMERCIAL SERVICES

Based on the supply of GIB® plasterboard to a 12 level commercial site in Auckland.
