

## **GIB® Intertenancy Barrier Systems**

The last few years has seen a rise in multi-unit residential design and construction, and with it an increasing popularity of intertenancy (IT) barrier systems to achieve superior noise attenuation and fire resistance between dwellings.

Central IT barrier systems have been developed to provide vertical separation between units and are ideally suited for Terrace Home applications. GIB® Intertenancy Barrier Systems for Medium Density provides solutions for both Timber Stud load-bearing walls and Steel Stud non-loading bearing walls. This webinar discusses the NZBC performance requirements, GIB® Intertenancy solutions, typical details, design considerations and available tools and resources.
