

GIB-COVE® SHIPPING AND HANDLING TIPS

PRODUCT HANDLING

by Cath Montgomery
Product Manager

Top tips to ensure that GIB-Cove® arrives on site in the best possible condition.

- Always have GIB-Cove® top stowed.
- Always use packaging protection to protect the edges from strapping and damage.
- The best way to carry GIB-Cove® is to use a two person lift with the GIB-Cove® on its edge. This prevents the lengths sagging which could damage the GIB-Cove® and result in post installation issues.
- Carrying stacks of a maximum of 5 lengths at a time ensures that the GIB-Cove® is fully supported to avoid sag.

Follow these simple techniques to ensure you get the best possible results from your GIB-Cove®.

For further information contact your local Area Sales Manager or call the GIB® Helpline on 0800 100 442.
