

Ready To Order?

1. Full contact details must be provided

- Name
- Phone number
- Clearly marked site address

2. Clear access to the site

- No scaffold
- No bricks
- No rubbish or rubbish bins blocking access

3. A cleared, accessible, and covered area to place the plasterboard

- Area must be under cover, and long enough for flat placement of plasterboard

4. The correct selection of service type

- We offer an inspection service on request to help you select the correct service type. 48 hours notice is required

5. Order deadline

- Order, or change an order by 3.00pm with your merchant for standard delivery the next business day
- 48 hours notice is required for Specialised Delivery

6. Delivery cancellations

- In the event a delivery cannot be made due to site constraints or wet weather, redelivery charges will apply if not cancelled prior to dispatch

7. Customer responsibility

- Customer is responsible for preparing a safe, plasterboard ready site and advising other on site contract parties of expected delivery date and time

Is Your Site Ready?

Not Plasterboard Ready

- Scaffolding obstructing the building access
- Poor housekeeping that may increase the risk of injury
- No clear access for flat placement of plasterboard

Plasterboard Ready

- Good access to the site
- Excellent Housekeeping
- Clear Internal Access

Delivery-to-site (DTS) text alerts

We offer a text service in addition to our current communication channels.

This service is provided through the following communication process.

Auckland GIB® Delivery to Site (DTS) Service Guide

- Specialists in plasterboard placement on site
- Variety of vehicles to suit any delivery type
- Extra labour available on request
- Text message alerts

Packaging

Plasterboard Stretch Wrapping Service

- Plastic cover sheet and stretch wrapped sides applied for weather protection on site

Note: Stretch wrapping a pallet is not a load restraint, it is primarily for weather protection. The wrap is not designed for ultra violet light protection. **There is an additional cost for this service**

Plasterboard Strapping Service

- High strength plastic strapping applied for product restraint on pallets. These restraints are used for delivery of plasterboard by cranes to structures over 3 levels high

Note: Ultimately it is the responsibility of the crane operator to ensure the load to be lifted is properly restrained. Load limits per pallet are influenced by the crane lifting capacity. **There is an additional cost for this service**

Delivery Situations

Standard delivery

Narrow driveway
height & weight restriction

Hiab lifting plasterboard
up high (8m to 15m)

Winstone Wallboards Site Delivery Guide

Any Doubts?

Does your requirements fall outside these parameters?
