

**GIB® STANDARD. THE NEW STANDARD
FOR BUILDING PEACE OF MIND.**

GIB® STANDARD PLASTERBOARD.

PROVEN PERFORMANCE FOR WALLS AND CEILINGS.

Since re-engineering GIB® Standard 10mm and 13mm in 2010, its strength, flexibility, and reputation for ease of installation and long lasting quality have been well proven on building sites nationwide. Simply put, it's the new standard for building peace of mind.

WHAT MAKES GIB® STANDARD THE NEW STANDARD?

Strong, thick paper liner.

THE NEW STANDARD IN PERFORMANCE.

Built-in high performance makes it suitable for multiple uses: maintains bracing performance of GS1 and GS2 systems and ceiling diaphragms as presented in GIB EzyBrace® Systems 2011; and can be used in relevant GIB® Fire Rated and GIB Noise Control® Systems.

"The flexibility's incredible. You can bend it 90 degrees around a corner and there's no chatter within the core." Graeme Beere, Auckland

Robust, fibreglass reinforced composite core with honeycomb technology.

Clean score and snap means cleaner cuts and better edges.

Low edge breakout and damage means less wastage.

Easy screw bedding means quicker installation.

Excellent uniformity means a consistent, quality finish.

Great flexibility means easy sheet manoeuvrability with less risk of damage and wastage.

Strong and rigid with low sag means easy sheet lifting and flat ceilings.

THE NEW STANDARD FOR CEILINGS.

Thicker 13mm GIB® Standard plasterboard is recommended for use on ceilings for a better quality finish, especially where New Zealand's wet and humid conditions mean ceiling sag can be amplified. Used in ceilings it can withstand distributed loads up to 3.0kg/m² easily supporting loads such as R5.0 insulation.
