

KEEP YOUR INTERIOR WALLS LOOKING GOOD FOR LONGER

TRIED, TRUE AND TRUSTED

GIB® plasterboard has been made in NZ for NZ conditions since 1927. GIB® plasterboard systems meet or exceed the stringent NZ Building Code requirements¹ and GIB® systems are independently BRANZ appraised². So, along with the GIB® Product and System Warranty³, you can have complete peace of mind that your home has been built using quality products and systems that will last.

MAINTAINING YOUR HOME'S INTERIOR LININGS

While your home is currently new and beautiful, over time your internal linings may suffer general wear & tear such as scrapes and holes. Interior linings repair and maintenance can easily be carried out by a professional. If you prefer to DIY, visit www.gib.co.nz/homeowner to view our step-by-step video tutorials and downloadable worksheets. The GIB® homeowner website has the information you need to create the interior you really want.

CAUTIONS WHEN CARRYING OUR REPAIRS, MAINTENANCE AND RENOVATIONS

Maintenance work on GIB® interior plasterboard linings may compromise performance as well as durability. Linings can have critical performance requirements such as in Fire Rated Systems or Bracing Systems. Please refer to your Building Plans to check what performance requirements particular linings need to deliver. Refer to the relevant literature to ensure the repairs maintain the integrity of installed Systems.

HERE WHEN YOU NEED US

If you have questions regarding GIB® products and systems, contact the GIB® Helpline on 0800 100 442.

1. When installed and maintained strictly in accordance with the relevant Winstone Wallboards literature current at the time of installation and under normal conditions of dry internal use.
